Market Technical Outlook

Nifty, opened on a subdued note but momentum on the downside was witnessed in the latter half of the session which led nifty to close in red. We maintain our stance that prices are still trading above the 10&20 day SMA (shown above in graph by green line as 20-daySMA and violet 10-days SMA). Hence, 18735 (10days SMA) & 18659 (20-days SMA) remains crucial support zone. In coming trading session if nifty trades above 18814 level then it is likely to test 18870–18950levels. On the downside, 18630– 18560 level may act as support for the day.

We still continue to maintain or stance that looking at the major pattern of inverse head and shoulder formed above 17900 level suggests that market is heading to test all-time high or even head higher in couple of weeks. Hence, one needs to adopt positive approach at current level as stock specific activity is likely to continue.
