Nifty opened lower traded with choppiness but finally closed in red. We still maintain our stance that there is a negative divergence in the RSI. At present, prices have closed below the 20-day SMA (17686). In coming trading session if nifty for first hour trades above 17686 level then it may test 17750 - 17830 levels. On the downside, 17500 - 17400 levels may act as support for the day.

At present,the 20-day SMA (17686) remains crucial resistance and negative divergence on RSI clearly indicates weakness. Hence, one needs to adopt cautiously positive approach at current level. However, stock specific activity is likely to continue.
