Source: BSE

Nifty, opened higher traded with positive bias throughout the day to close in green. On the daily chart, we are observing an inside day formation near the 20-days SMA (18087). Hence, 20days SMA remains immediate support for nifty. Incoming trading session if nifty trades above 18261level then it may test 18350-18430 levels. On the downside, 18140-18087 levels may act as support for the day.

We still continue to maintain our stance that, looking at the position of the short term moving averages and position of the momentum indicator viz. RSI we are of the opinion that we may see some consolidation or minor correction but eventually we are likely to head higher and touch all-time high of 18604 in couple of weeks. Hence, one should adopt positive approach at current level.
