Market Technical Outlook

Nifty opened lower in wake of weak global clues, traded with extreme choppiness but finally managed to close in red. On the daily chart, we are observing that prices tested the 50 days SMA (17505) by making a low of 17485 and has close above it. Further, after three days of fall we are now witnessing that prices have made a “Doji” candlestick pattern. Hence, a bounce from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17707 level then only a bounce up to 17760 – 17700 levels could be possible. On the downside, 17500 – 17400 levels may act as support for the day.

We still continue to maintain our stance that looking at the current pattern formation on the daily chart, it is evident that corrective move from current level cannot be ruled out. Hence, one needs to adopt cautiously positive approach at current level.
