Market Technical Outlook

Nifty opened higher but was unable to sustain the opening gains and selling intensified as the day progressed which led nifty to close in red. On the daily chart, we are observing lower top lower bottom formation which is sign of weakness. In coming trading session if nifty trades below 21190 levels then it may test 21120 – 21030 levels. On the upside, 21350 – 21450 levels may act as resistance for the day.

We still maintain our stance that looking at the current price action on daily charts it is evident that 22124 may be an intermediate top. Hence, one needs to adopt cautious approach at current level.
