Market Technical Outlook

Nifty, opened higher and witnessed strong momentum on the upside in the latter half of the session which led the indices to close in green. On the daily chart we are observing positive candle with higher volumes which indicates that the undertone has turned positive. In coming trading session if nifty for first hour trades above 15200 level then it may test 15300 – 15400 levels. On the downside, 15050 – 14900 levels may act as support for the day.

Since the prices have closed on a strong note with higher volumes we are of the opinion that one needs to trade with positive approach at current level. Further, stock specific activity is likely to continue in small and Mid-cap stocks.
