Market Technical Outlook

Nifty opened higher traded with positive bias with choppiness during the day but finally managed to close in green. On the daily chart we are observing a narrow range body formation which has formed a higher high pattern. In coming trading session if Nifty for first hour trades above 16540 then it may test 16620 - 16650 levels. On the downside, 16390- 16280 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
