Nifty, opened higher and momentum on the upside intensified as the day progressed which led the indices to close in green. We maintain our stance that prices have taken support at the 21-day SMA and formed two consecutive positive candles. This suggests that momentum on the upside may continue. In coming trading session if Nifty trades above 13620 levels then it may test 13750 - 13900 levels. On the downside, 13500–13400 levels may act as support for the day.

We maintain our stance that 13000 – 13300 is strong demand zone. Hence a strong bounce cannot be ruled out from current level. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
