Source: BSE

Nifty opened lower and witness buying in the latter half of the session which led nifty to close in green. On the daily chart, we are observing a narrow range body formation which suggests that markets are circumspect at current level. In coming trading session if nifty trades above 21490 levels then it may test 21560 – 21630 levels. On the downside, 21350 – 21250 levels may act as support for the day.

We still maintain our stance that looking at the current price action on daily charts it is evident that 22124 may be an intermediate top. Hence, one needs to adopt cautious approach at current level.
