Market Technical Outlook

Nifty opened lower, initially traded with negative bias but witnessed buying in the final hour of the trade to close in green. We continue to maintain our stance that on the daily chart, we are observing that prices have taken support at the 20days SMA (17390) has formed two positive candle this suggests that upside momentum is likely to continue. In coming trading session if Nifty for first hour trades 17630 level then it may test 17700 – 17800 levels. On the downside, 17500 -17400 levels may act as support for the day.

At present, the 200-days SMA (16980) is still falling, hence one need to be cautious at current level. However, stock specific activity is likely to continue.
