Nifty, opened higher but was unable to sustain the opening gains and minor profit booking emerge from day's high which led Nifty to close marginally in green. We still maintain our stance that the upward gap area of 17328 to 17434 is likely to act as support for the prices. In coming trading session if Nifty trades above 17625level then it may test 17680 - 17750 levels. On the downside, 17460— 17370levels may act as support for the day.

Broadly, looking at the position of short term moving averages and positon of the momentum indicator viz. RSI. We are of the opinion that momentum on the upside is likely to continue. Hence, one should adopt positive approach at current level.
