Nifty, opened higher, traded in a narrow range with positive bias throughout the day to close in green. On the daily chart, we are observing an upward gap area in the range of 12968 to 12978. Normally upward gap area do act as support for prices. Further, the upward gap area reflects that sentiment in the market is positive. In coming trading session if Nifty trades above 13080 levels then it may test 13200 - 13300 levels. On the downside, 12900 -12800 levels may act as support for the day. We still maintain our stance that the trend remains up but a consolidation or minor correction from current level cannot be ruled out. Hence, one should adopt buy on decline strategy.
