Market Technical Outlook

Nifty, opened higher but was unable to sustain the opening gains and finally managed to close with minor gains. On the daily chart we are observing two narrow range body formations with higher high this suggests that markets are circumspect at higher level. In coming trading session if Nifty for first hour trades above 15295 level then it may test 15350– 15400 levels. On the downside, 15100 -14950 levels may act as support for the day.

We still maintain our stance that stock specific activity is likely to continue in small and Mid-cap stocks.
