Nifty opened on a subdued note traded with extreme choppiness but managed to close marginally in green. On the daily chart, we are observing two consecutive candlestick patterns which resembles a spinning top. This gives small clue that the prior downtrend is losing breath. In coming trading session if nifty for first hour trades above 18250 levels then it may test 18300 - 18320 levels. On the downside, 18100 - 18000 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
