Nifty opened on a subdued note traded with choppiness but witnessed buying in the latter half of the session which led nifty to close in green. On the daily chart, prices are holding the low of 17216 for two consecutive trading session which suggests that a pullback rally from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17565 level then it may test 17650 – 17750 levels. On the downside, 17450 -17350 levels may act as support for the day.

We maintain our stance that the daily trend remains down hence pullback rallies are likely to attract selling pressure. Hence, one needs to adopted cautiously positive approach at current level. However, stock specific activity is likely to continue.
