Market Technical Outlook

Nifty, opened higher traded in a narrow range with positive bias to close in green. On the daily chart we are observing that prices are trading above the demand zone shown above in the graph. At present we are seeing a narrow range body formation which is trading below the 21-day SMA (14588). This suggests that markets are circumspect at current level. In coming trading session if nifty for first hour trades above 14580 levels then it may test 14700 – 14750 levels. On the downside 14300 – 14200 may act as support for the day.

At present, one needs to adopt cautious approach at current level. However stock specific activity is likely to continue in small and Mid-cap stocks.
