Market Technical Outlook

Nifty, opened higher in wake of positive global clues and trades with positive bias throughout the day to close in green. On the daily chart we are observing three narrow range body formations with higher high this suggests that markets are cautiously positive at current level. In coming trading session if Nifty for first hour trades above 15320 level then it may test 15400– 15550 levels. On the downside, 15200 -15100 levels may act as support for the day.

We still maintain our stance that stock specific activity is likely to continue in small and Mid-cap stocks.
