Market Technical Outlook

Nifty opened on a subdued note and momentum on the downside intensified as the day progressed which led the indices to close in red. On the daily chart, we are observing a bear candle within the supply zone (16443 to 16793). This suggests weakness going forward. In coming trading session if Nifty for first hour trades below 16463 level then it may test 16360 – 16250 levels. On the upside, 16580 - 16660 may act as resistance for the day.

We still maintain our stance that there is high probability that we may see a pullback from the supply zone. Hence, we are of the opinion that one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
