Nifty opened on a subdued note but selling intensified in the latter half of the session which dragged down Nifty to close in red. On a daily chart, we are observing a bear candle; however the close is above the 21-day SMA (11685). In coming trading session if Nifty trades below 11700 level then it may test 11685 - 11600 - 11550 levels. On the upside 11800 - 11930 levels may act as resistance for the day.

We still maintain our stance that 11661 the low of bearish engulfing pattern remains a make or break level on daily closing basis. If Nifty manages to hold the low of 11661 then we may see momentum towards 12000 level. At present cautiously positive approach at current level should be adopted. However, stock specific activity is likely to continue.
