Market Technical Outlook

Nifty, opened on a subdued note but witness a rally in the latter half of the session to close in green. On the daily chart we are observing a spinning top candlestick pattern which suggests that a pullback from current level cannot be ruled out. In coming trading session if nifty trades above 18070 level then it may test 18120 – 18250 levels. On the downside, 17880 – 17760 levels may act as support for the day.

At present prices are trading below the 50-daySMA (18200), hence one needs to adopt cautious approach at current level.
