Nifty opened on a subdued note and momentum on the upside intensified as the day progressed which led nifty to close in green. We maintain our stance that on the daily chart, prices have taken support within the upward gap area of 20950–21074 and are continuing the upward momentum. In coming trading session if nifty for first hour trades above 21477 level then it may test 21550 - 21640 levels. On the downside, 21330–20250 levels may act as support for the day.

Broadly, as expected and mentioned in your earlier report prices took support at the upward gap area mentioned above. This suggests that momentum on the upside is likely to continue. Hence, one should adopt cautiously positive approach at current level as stock specific activity is likely to continue.
