### Market Technical Outlook

Nifty, opened lower and momentum on the downside intensified as the day progressed which led the nifty to close in red. On the daily chart we are observing that prices have convincingly closed below the 21-day SMA (14292). This suggests that uptrend has come under pressure. In coming trading session if Nifty trades below 13929 level then it may test 13800 - 13758 levels. On the upside, 14100 - 14200 levels may act as resistance for the day.

Since, prices have closed below 14000 level, there is high probability that nifty may test 13707 levels which is the 50-day SMA. Hence, one needs to be cautious at current level.

### Foreign Institutional Investments (FII's) Activities
