Source: BSE

Nifty opened lower in wake of weak global cues made a low of 16866 recovered some of its losses during the day to close in red. On the daily chart, we are observing that 16800 to 17000 demand zone is acting as support for the prices. This suggests that a bounce form current cannot be ruled out. In coming trading session if Nifty for first hour trades above 17182 levels then it may test 17250 – 17300 levels. On the downside, 17000 – 16900 levels may act as support for the day.

Broadly, looking at the current price action it is evident that 16800 - 17000 demand zone is make or break level. Hence cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.
