Market Technical Outlook

Nifty, opened lower but as day progress we have seen volatile trade. On the daily chart, we are observing “Doji” candlestick formation and Nifty hold the 200 (SMA) line on closing basis which suggest that some pullback we can see from current level. In coming trading session if nifty trades below 17350 level then it is likely to test 17280 – 17200 levels. On the upside, 17450 – 17520 levels may act as resistance for the day.

Broadly, looking at the current price action it is evident that 17367 (200-daysSMA) is a make or break level if we get a daily close below it then we may witness selling pressure to increase. Hence, one needs to adopt cautious approach at current level.
