(Notes)

Market Technical Outlook

Nifty opened lower but momentum on the upside gradually picked up during the day to close near days high. On the daily chart, we are observing prices have taken support at the lower range of the supply zone (16443 to 16793) and have close on a positive note. In coming trading session if Nifty for first hour trades above 16653 then it may test 16760 – 16850 levels, On the downside, 16530 – 16440 levels may act as support for the day.

Since, price have tested the lower band of the supply zone mentioned above and has close on appositive note we are of the opinion that momentum on the upside is likely to continue. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
