Market Technical Outlook

Nifty opened a subdued note, traded with mild negative bias to close marginally in red. We continue to maintain our stance that on the daily chart, prices have faced resistance at 19850 levels (shown above in the graph). At present we are witnessing seven narrow range body formations which indicate that markets are circumspect at current level. In coming trading session if nifty trades above 19820 level then it may test 19900–20000 levels. On the downside, 19700–19600 levels may act as support for the prices.

We maintain our stance that 19850 is strong resistance any daily close above it may propel nifty to test prior all-time high of 20222 in couple of weeks. Hence, one should adopt positive approach at current level as stock specific activity is likely to continue.
