Nifty opened down in wake of weak global clues and momentum on the downside intensified as the day progressed which led nifty to close in red. on a subdued note traded with choppiness but witnessed buying in the latter half of the session which led nifty to close in green. On the daily chart, we are a bear candle which suggests that downside momentum is likely to continue. In coming trading session if Nifty for first hour trades below 16985 then it may test 16900 – 16700 levels. On the upside, 17150 - 17250 may act as resistance for the day.

We maintain our stance that the daily trend remains down hence any pullback rallies are likely to attract selling pressure. Hence, one needs to adopted cautious Approach at current level. However, stock specific activity is likely to continue.
