Source: BSE

Nifty opened higher traded in a narrow range with positive bias throughout the day to close in green. On the daily chart we are observing that prices have closed marginally above the 50-day SMA (12122). Hence, going forward 12100 on closing basis would remain crucial level, if breach then further selling may emerge. Hence, as long as 12100 holds one should adopt cautiously positive approach at current level as stock specific activity is likely to emerge. Since, Nifty has marginally closed above 50-day SMA (12122) we are forced to give two scenario

1) If Nifty opens in the range of 12088 – 12063 one can initiate long with a stop loss of 12050 for a target of 12144 – 12154 - 12179 levels.

2) If Nifty opens higher in the range of 12144 – 12154 then go short with a stop loss of 12170 for a target of 12113 – 12088 - 12056 levels.
