Market Technical Outlook

Nifty, opened a flat note and momentum on the downside intensified as the day progressed which drag nifty to close deep in red. On the daily chart, we are observing two consecutive strong bear candle which has close well below the 20-days SMA (18006) & 50-days SMA (18248). This suggests weakness. In coming trading session if nifty trades below 17574 level then it may test 17450 - 17340 levels. On the upside, 17700 - 17800 levels may act as resistance for the day.

At present, market is at crucial demand zone of 17400 – 17500 levels, hence a bounce cannot be ruled out from the mentioned zone. However, trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.
