Market Technical Outlook

Nifty opened higher and momentum on the upside intensified as the day progressed which led nifty to close in green. On the daily chart, we are observing that prices tested the supply zone of 21720 -21750 level made a high of 21763 but has close within it. In coming trading session if nifty trades above 21763 levels then it may test 21840 - 21930 levels. On the downside, 21620 – 21550 levels may act as support for the day.

Broadly, looking at the current price action it is evident that markets have close above the 20-day SMA (21632). This gives a small clue that sentiment have turned positive and nifty is all-set to test prior all-time high of 22124 or even register a new all –time high. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
