### Market Technical Outlook

Nifty, opened higher but was unable to sustain the opening gains but however managed to close in green. On the daily chart we are observing that prices have closed above the 50-day SMA (14793 shown in red in the above graph) and formed a “Doji” candlestick pattern. This suggests that markets are cautiously positive at current level. In coming trading session if nifty for first hour trades above 14960 level then it may test 15000 - 15100 levels. On the downside, the upward gap area of 14667 to 14694 is likely to act as support for the day.

**We still maintain our stance that, one needs to adopt cautiously positive approach at current level. However, stock specific activity is likely to continue in small and Mid-cap stocks.**
