Market Technical Outlook

Nifty opened with flat note, but as day progress it start trading higher and managed to close in green. On the daily and weekly chart we are observing breakout of consolidation this suggests upside momentum. In coming trading session if Nifty for first hour trades above 16720 levels then it may test 16780 - 16810 levels. On the downside, 16580 – 16520 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
