Market Technical Outlook

Nifty opened higher but was unable to sustain the opening gains and selling dragged nifty to make a low of 16782. However, sharp recovery was seen during the day from day's low which led nifty to close in green. On the daily chart, we are observing a "Doji" candle stick pattern which gives small clue that a pullback rally from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17160 levels then it may test 17250 – 17300 levels. On the upside, 16950 16850 levels may act as support for the day.

We still maintain our stance that the daily trend remains down hence any pullback rallies is likely to attract selling pressure. Hence, one needs to adopted cautious approach at current level. However, stock specific activity is likely to continue.
