Nifty opened on a subdued note and traded with positive bias during the day to dose in green. On the daily chart, we are observing two consecutive narrow range formations with higher high. This suggests that momentum on the upside is likely to continue. Incoming trading session if nifty trades above 18678 level then it may test 18730—18840 levels. On the downside, 18500—18400 levels may act as support for the day.

Broadly looking at the placement of the moving averages and RSI we are of the opinion that now nifty is likely to test 19000 – 19500 in couple of weeks. Hence, one should adopt buy on decline strategy in this market.
