Nifty, opened higher traded in a narrow range with choppiness but managed to close in green. On the daily chart we are observing a continuation of higher highs which suggests that the undertone is still positive. In coming trading session if Nifty trades above 13970 levels then it may test 14100 - 14200 levels. On the downside, 13800—13700 levels may act as support for the day.

Broadly, looking at the upward gap area and higher highs formations we are of the opinion that the undertone is positive and nifty is likely to continue its upward momentum. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
