Nifty, opened lower traded with extreme choppiness and finally managed to close in green. On the daily chart, we are observing that prices have taken support near the lower trendline of falling channel (shown above in the graph). Hence, a bounce from current level cannot be ruled out. In coming trading session if nifty trades above 17710 level then it may test 17800 - 17900 levels. On the downside 17550 - 17430 levels may act as support for the day.

We maintain our stance that trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.
