### Market Technical Outlook

Nifty, for second consecutive trading session opened up with a gap and traded in a narrow range with positive bias to close in green. On the daily chart, we are observing that prices have reclaimed the 50-days SMA19600 and closed within the supply zone of 19600 to 19766. In coming trading session if nifty trades and close above 19675 level then it may test 19760 – 19850 levels. On the downside, 19550 – 19440 level may act as support for the day.

We maintain our stance that there is strong supply zone in the range of 19600 to 19766 level. If nifty manages to close above it, then only it will resume its upside momentum. Hence, cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.
