At CMP of INR 3396, Coforge is trading at FY23 P/E of 26.8x. Coforge is poised to show strong momentum in FY22 due to strong guidance for FY22 and is planning for an organic growth of at least 17% in constant currency terms during FY'22 and an expansion of EBITDA margin (excluding ESOP and acquisition related costs) from 18% in FY'21 to 19% in FY'22 and could outpace peers because of wide margin.

Key Concall Highlights

Outlook:

The company reported robust revenue growth in Q4FY21 and FY21 despite having higher exposure to the travel vertical. Going forward, Coforge is pursuing three greater than US\$50 million deals (of which one is US\$100 million deal) and has also seen a healthy order book. This, coupled with bottoming out of travel vertical, improved growth in healthcare (10% of revenue, with external leader, sales team leader, business leader and delivery leader) and ramp up in Insurance & hi tech (8% of revenues) vertical bode well for the company's long term revenue trajectory. Coforge is also becoming a preferred partner for Fortune 500 insurance and Tier 1 banking companies, which will help in winning large deals, going forward. In addition, the company's prowess in cloud, data and application has given it the confidence of 17% YoY organic growth in FY22E. This, coupled with synergies with recent acquisition and aggressive hiring (headcount up 20% since January 2021)

Margin trajectory –EBITDA margins were flat on a QoQ basis despite higher revenue growth due to one-time bonus to employees. The company plans to give wage hikes in FY22E.

Deal wins – Fresh order intake was at US\$201 million, up 5% QoQ. The executable order book over the next 12 months is up 11.1% YoY to US\$520 million. The company added 11 new customers of which four were from the US, five from EMEA and two from RoW.

Client position: The company's top five and top 6-10 clients increased 11.7% QoQ and 17.9% QoQ, respectively.

Employees: The company added 967 employees to 12,391. Utilisation also increased 210 bps QoQ to 81.0% while attrition was flat at 10.5%
