Ph- 022 67114865

ICICI Bank maintains a stable performance amid all the chaos of advance provisioning by major banks, well beyond RBI mandated 5% provisioning for Covid-19. **NII increased by 19.9% YoY/4.0% QoQ to Rs 9,280 Cr, PPOP increased by 71.4% YoY/45.8% QoQ to Rs 10,776 Cr and Net Profit increased to Rs 2,599 Cr, up by 3 6.2% YoY /112.8% QoQ.** Other income increased on account of stake sale of Rs 3,036 Cr in the insurance subsidiaries. The bank has taken precautionary Covid-19 provisions of Rs 5,550 Cr during Q1FY21 (total corona provisioning Rs 8,275 Cr). It remained 17.5% under moratorium down from 30% at March end.

Key Highlights of Q1 FY21:

NIMs at comfortable levels, costs came down as well: The bank's NIMs stood at 3.69% (up +16bps YoY/-18 bps QoQ) while the Cost of Funds stood at 4.61% (down -62bps YoY/-31bps QoQ) for Q1FY21 reflecting the fallen costs and increasing spread for banks amid the interest rate cuts by RBI. The bank's CASA fell to 42.5% (45.1% in Q4FY20), albeit due to excessive growth of term deposits (27.4% YoY/8.9% QoQ).

Marginal sequential fall in Loan Book: The fall in several loan segments was more seen in credit cards and other personal loans segment while the mortgage segment (half of retail) grew by only 0.4% in the quarter.

Improvement in Asset Quality due to RBI moratorium: The bank's asset quality improved with the GNPA/NNPA coming down to 5.46%/1.23% by Q1FY21. However, the bank has provided Rs 5,550 Cr during Q1FY21 towards pre-provisioning for Covid-19 and has provided total of Rs 8,275 Cr towards Covid-19 till now.

Good performance by subsidiaries despite lockdown: The insurance subsidiaries of the bank fared better among peers in the lockdown quarter.

Valuation & View

ICICI Bank is poised to do well in terms of NIMs and PPOPs for the next few quarters due to excessive liquidity in hand, fallen interest rates and highly regulated sanctioning of new loans towards both retail and corporate segment. The bank's vast branch chain of 5,324 branches across the nation along with crafted IT platform for digital banking services will propel the growth as & when the normalcy returns. The bank's insurance subsidiaries however will not be paying dividends, thereby decline in dividend income for the year ahead. ICICI Bank is currently trading at a 1.9x P/Adj. BV FY22E. We assign a P/adj. BV multiple of 1.7x on FY22E adj. BV of INR 185 for standalone bank and use a SOTP approach to value its subsidiaries, arriving at a Target Price of INR 425 with an Accumulate rating.

Q1 FY21 – Key Concall Highlights

- ICICI Bank's management is focussed to reduce its concentration risk and improve credit ratings in the corporate portfolio.
- Moratorium stood at 17.5% at the end of June 2020 against 30% at the end of March 2020.
- 97% of the customers availing moratorium are getting salaries credited.
- About 90% of the accounts under moratorium are the same which were under moratorium at the end of May 2020.
- About 9% of the portfolio is comprised of unsecured Personal loans and Credit Cards.
- Credit Card spend is at 65% of the pre-Covid levels. Credit Card spend was higher by 79% in June in comparison to April and May.
- The management confirmed that there are no incremental overseas provisioning.
- 60% of the customers in the commercial vehicles are long vintage customers of the bank.
- NBFCs and HFCs form 5% of the total loan book.
- The management refrained from providing any particular target set by the management to be fulfilled
