Strong order book: Coforge anticipates a margin expansion of 100bps in Q3, driven by factors such as hedge gains (~40 bps), the absence of a client event in Q3 (40 bps), reduced ESOP charges (~30 bps), and some benefits from ARC, although partially offset by the impact of furloughs. The company maintains its confidence in achieving a margin of ~18.3% in FY24. This optimism is supported by the increase in offshore revenue share, up by 220 bps YoY, and the goal to reach 55% (up from 52%).

Gen Al: Innovative Solutions Fueling Scalable Deal Conversions: Continuing to explore prospects in Gen Al and advanced analytics, success in sealing deals is driven by expertise in productization, legacy modernization, product innovation, and cloud migration. The unique customer-centric approach of challenger organizations, along with their hunger to meet enterprise client demands, contributes to the growing deal volume and conversion rates at scale.

Valuations and outlook

Coforge Ltd's Q2 USD revenue growth outperformed its industry peers but fell short of the company's anticipated targets. The management remains optimistic due to their robust deal execution, ongoing momentum, and proactive investments aimed at sustaining growth, even in the face of economic challenges. The company is expected to maintain its growth trajectory beyond FY24, as indicated by its significant victories in the BFSI sector. The company's strong performance and increased success in securing deals contribute to its solid position. Coforge is projected to sustain robust growth not only in FY24 but also in the future. Despite being impressed with Coforge and considering it one of the best managed IT Tier-II companies. We value, Coforge at a PE of 27x its FY25E EPS of ~195, which yields a target price of INR 5,260 per share (Earlier target price of INR 5,284 per share). Despite strong execution and client relationships, we downgrade to Neutral from an Accumulate earlier on the stock, reflecting current valuations.
