### Market Technical Outlook

Nifty opened on a subdued note traded in a narrow range with mild negative bias and finally close on a flat note. On the daily chart, we are observing two consecutive “Doji” candlestick pattern. This suggests that markets are circumspect at current level. In coming trading session, if nifty trades above 22500 levels then it may test 22560 - 22640 level. On the downside, 22350 – 22280 may act support for the day.

**We maintain our stance that looking at the breath of the market, we are of the opinion that mid-cap and small-cap may & Nifty – 500 may continue to outperform. Hence, one needs to adopt positive approach at current level.**
