Market Technical Outlook

The Nifty opened down with a gap and traded in a narrow range with negative bias to close in red. After a gap down opening prices are still trading well above well above the rising 20-day SMA (24588). Hence, 24588 on daily closing basis remains important support for the market. In the upcoming trading sessions, if Nifty trades above the 24790 level, it may test the 24840 – 24930 levels. On the downside, the 24,600 – 24,500 range may act as support for the day.

Broadly, looking at the current price action it is evident that we may witness a corrective move towards the demand zone of 24582 to 24480 level from where reversal may emerge. Hence, one needs to adopt a cautiously positive approach at the current level, as stock-specific activity is likely to continue.
