Nifty opened lower traded in a narrow range with negative bias throughout the day to close in red. On the daily chart, we are observing three consecutive narrow range body formations, which suggests that markets are circumspect at current level. In coming trading session if Nifty trades above 22402 then it may test 22450 – 22530 levels. On the downside, 22250 - 22170 levels may act as support for the day.

Since, market are still trading well above the 10&20-days SMA (22216 & 22053) we are of the opinion that the undertone is positive and markets may again test the prior all-time high or even head further. Hence, one needs to adopt positive approach at current level.
