Market Technical Outlook

Nifty opened on a subdued note, made a new all-time high of 23411 but witness selling pressure in the final hour of trade, which led nifty to close in red. On the daily chart, we are observing a narrow range body formation, which suggests that markets are circumspect at higher level. In coming trading session if nifty trades above 23300 level then it may test 23350 - 23460 levels. On the downside, 23140 - 23060 levels may act as support for the day.

We maintain our stance that looking at the current price action & the breath of the market it is evident that momentum on the upside is likely to continue. Hence, one can adopt cautiously positive approach at current level, as stock specific activity is likely to continue.
