### Market Technical Outlook

The Nifty opened higher traded with choppiness with positive bias to close in green. We maintain our stance that the 50-days SMA (23967) is crucial support. In coming trading sessions, if Nifty trades above 24420 level then it may test 24480 – 24560 levels. On the downside, 23250 – 24150 may act support for the day.

Broadly, looking at the current price action it is evident that the 50-days SMA (23967) on daily closing basis remains a make or break level. Any close below the mentioned level would derailed the current up trend. Hence, one needs to adopt a cautiously positive approach at the current level, as stock-specific activity is likely to continue.
