Market Technical Outlook

The Nifty opened lower traded with negative bias throughout the day to close in red. We maintain our stance that the 50-days SMA (24037) is crucial support. In coming trading sessions, if Nifty trades below 24100 level then it may test 24052 - 23960 levels. On the upside, 24250 - 24360 levels may act as resistance for the day.

Broadly, looking at the current price action it is evident that the 50-days SMA (24037) on daily closing basis remains a make or break level. Any close below the mentioned level would derailed the current up trend. Hence, one needs to adopt a cautiously positive approach at the current level, as stock-specific activity is likely to continue.
