**Market Technical Outlook** 

Nifty opened higher traded with positive bias throughout the day to close in green. On the daily chart, we are observing three consecutive trading session with higher high formation. This suggests that momentum on the upside is likely to continue. In coming trading session if nifty trades above 22270 then it may test 22330 - 22440 levels. On the downside, 22100 - 22000 levels may act as support for the day.

We still maintain our stance that prices are trading well below 50 days SMA (22296) one needs to adopt cautious approach at current level.
