### Market Technical Outlook

Nifty opened down with a gap in wake of week global clue and momentum on the downside intensified in the latter half of the session to close in red. On the daily chart, we are observing a downward gap area in the range of 22503 to 22427. Normally, downward gap area does act as resistance for the prices. In coming trading session, if nifty trades below 22250 level then it may test 22150 – 22070 level. On the upside, 22370 – 22480 levels may act as resistance for the day.

**Broadly, due to geopolitical tension we could see more pressure on nifty. However, one needs to keep 22100 on daily closing basis as a bull stop for long position. Hence, one needs to adopt cautious approach at current level and wait for the geopolitical dust to settle down.**
