Market Technical Outlook

Nifty opened lower, traded in a narrow range with choppiness but finally managed to close in green. On the daily chart, we are observing that prices tested the 50-days SM (21916) by making a low of 21916 and has close well above it. In coming trading session, trades above 22120 level then it may test 22150 – 22260 levels. On the downside, 21950 - 21880 levels may act as support for the day.

Since, market has tested 21900 for five trading session it is evident that 21900 level remains a make or break level. Hence as long a nifty holds 21900 on daily closing basis there is fair chance that nifty may bounce to 21300 – 21500 levels in couple of days.
