Market Technical Outlook

Nifty opened lower but momentum on the upside intensified as the day progressed which led nifty to record a new all-time high of 24,837. On the daily chart, we observe a positive candle, which suggests that momentum on the upside is likely to continue. In the upcoming trading sessions, if Nifty trades above the 24,837 level, it may test the 24,910 - 25010 range. On the downside, the 24,700 – 24,580 levels may serve as support for the day.

We maintain our stance that upward momentum is likely to continue. However, some consolidation or minor correction is possible. Therefore, a cautiously positive approach, is recommended at the current level, as stock-specific activity is expected to persist
